

# Application Menu and Queries to Implemented

**PART A (Application Menu flow)** \*\*\* be sure to scroll to end of document for PART B which has the queries

This section illustrates the application flow as a sequence of menus for the **Customer Loyalty Marketplace** system. We expect you to follow this program flow strictly to enable uniformity of testing. Interface can be either text-based or graphical.

**You must validate all user input and display appropriate error messages whenever necessary prompting the user to re-enter his input, even if it may not be explicitly stated.**

## Start Pages

Home

## PART B (Queries)

### Show queries

The list below comprises the queries that you should implement as part of the submission (prior to demo). The “**Show queries**” menu option referred to in PART A of this document should generate a queries menu that has a list of numbers corresponding to the queries below (or the query texts). The queries menu should then produce the

answer for each corresponding query when selected. For example, selecting 1 from the displayed menu should show the result of query 1 on this list.

Note that some queries contain highlighted phrases. These are just placeholder entity names. Exact names will be given later based on our actual sample data.

1. List all customers that are not part of Brand02's program
2. List customers that have joined a loyalty program but have not participated in any activity in that program (list the customerid and the loyalty program id).
3. List the rewards that are part of Brand01 loyalty program
4. List all the loyalty programs that include "refer a friend" as an activity in at least one of their reward rules.
5. For Brand01, list for each activity type in their loyalty program, the number instances that have occurred.
6. List customers of Brand01 that have redeemed at least twice.
7. All brands where total number of points redeemed overall is less than 500 points
8. For CustomerA, and Brand02, number of activities they have done in the period of 08/1/2021 and 9/30/2021
